

KEEPING EACH OTHER HEALTHY DURING COVID-19

The guidelines below will reduce the risk of spreading illness at school. Guidelines may change over time.

Health Screening

Every Day Before School: Check your child's temperature and look for signs of illness

Your child should stay home if they:

- Have any of these symptoms, or has been diagnosed with COVID-19
- Have been told to isolate or quarantine by your doctor or the health department
- Had recent close contact with someone with COVID-19 - within 6 feet of an infected person for at least 15 minutes
- Traveled somewhere outside the U.S. within the last 14 days

Please note that your child may be required to stay home and participate in distance learning for up to 10-14 days based on public health guidelines. **Report your child's absence and symptoms to the school each day.**

Use Cough/Sneeze Hygiene

Teach children to sneeze into a tissue or elbow. Throw tissue away in a waste container. Wash hands with soap and water or use hand sanitizer. Do not touch face.

Practice Hand Hygiene

Students should wash hands before leaving home and upon returning home. All students will wash hands often or use hand sanitizer at school.

Use Cloth Face Coverings at School

Children should come to school with a cloth face covering, unless a doctor says not to, or the child can't safely wear one due to their developmental level. Wash cloth face coverings daily at home. Face coverings may be available at school if needed.

Maintain Physical Distancing at School

Keep at least 6 feet away from other people. Space is the best way to avoid the spread of COVID-19. Do not form groups with other parents during drop off and pick up.
