

Distance Learning Open Ended Grades 4-6 Responses

Anonymous ID	Grades 4-6: Translated student Survey Responses to "What is one suggestion that you have to improve your Distance Learning Experience?"
1	?
2	16-05 Problem Solving: Work Backward
3	3 lessons per day???
4	6 feet apart.
5	a better system
6	A bit of math
7	A little bit more interaction with friends.
8	A little bit of homework
9	A little less daily work.
10	a little less work per week
11	a little more fun
12	a little more work.
13	A lot of distance learning
14	A lot of math
15	A suggestion I have for this Distance Learning Education is that videos were used. Whether made by the teacher or not, they can be very helpful.
16	A way to get rid of assignments on google classroom that you already did so it could be less confusing when trying to find the assignment that you need to work on.
17	Access to an online or physical school book.
18	actually paying attention to my work.
19	add more settings to zoom.
20	additional assistance
21	All classes should give work in the summer (that is not required) but is an option. 15-30 min student-teacher check-in once every 2-3 weeks.
22	All teachers do zoom with there classes
23	all was wash your hands 30 sec
24	All ways listening to students in google class room and answering questions.
25	always look out for the work that needs to be done.
26	An extra 20 minutes where we get to talk to our classmates and teachers and see how they are doing. (But this would be optional if people had to leave)
27	answering quickly
28	As a special needs student, distance learning is ineffective and useless. My son requires in-person teaching and therapies. The staff did the best they could with the limitations, but it's an unsuccessful long term solution.
29	Ask the kids what they need help with more often, don't blame them for not understanding/doing all there work as fast as the other kids do because you don't know what they go through and were not all the same, stop complaining if we missed something and if we don't understand then please explain again and know that some of us are scared to ask things in front of other students so maybe make another zoom with us only or a few kids at a time.
30	assign things on different days. Sometimes teachers will skip a day or 2 then assign what they missed on a day and when all the teachers assign stuff at once its a bit too much. Also try to make things easier. Its so hard to stay focused for long periods of time so when the videos are boring i dont usually finish them or have to watch them in sections.
31	bad
32	be more specific
33	Being able to do more Math and Science at home.
34	being able to socialize (but then there wouldn't be online school so it kinda is the opposite of distance learning) other than that i had a great time with distance learning
35	Being able to work in small groups virtually, and do activities within that group. The group would be made up of classmates.
36	better methods to communicate
37	Better platforms with less lagging.
38	Better WiFi for my zoom Meetings
39	Better WiFi.
40	by doing my vocabulary and other stuff
41	by making good choices
42	by not going to close to other people
43	can i continue my work on iready and here?
44	Change up the groups once in a while.
45	check on how your students are doing
46	come once a week
47	Comprehension
48	Consistent subjects over a longer per of time with some breaks.
49	Continue using Khan Academy for math. Use more small groups I miss small groups.
50	create true lessons plans for students, have teacher be available during school hours and either do live training and provide feedback so students know what they are learning.
51	Daily instruction from the teachers.
52	Daily zoom instruction
53	desimels
54	Different ways to solve problems.
55	Distance learning does not work for special education classes...need in person for us!
56	do it on a computer and pay attention
57	Do less zoom meetings so we have more time to do the homework.
58	Do not use zoom for security purposes, servers to store info is in China even though zoom is based in California.
59	Do zoom calls with teacher, and class
60	Do zoom classes more
61	Do zoom meeting often more than what we do right now to help us understand things more.
62	doing a extra zoom meeting so the teachers can explain a certain assignment if people do not understand it or have questions or need help with it.
63	Doing my work better
64	Doing zooms that actually teach lessons, not just assigning busy work.
65	Don't be afraid to ask for help
66	Don't do distance learning
67	Don't do it, do not do distance learning
68	Don't give us I-Ready, I rather have more social activities with distant learning
69	don't leave challenging work often .
70	Don't post everything at one time. It is over whelming

Distance Learning Open Ended Grades 4-6 Responses

Grades 4-6: Translated student Survey Responses to "What is one suggestion that you have to improve your Distance Learning Experience?"	
71	ELA
72	ELA
73	ELA I think and MATH
74	every thing was good but I think it would be better to slow down the pace and have longer due dates
75	Everybody in the class should be in the meeting
76	Everything was fine about the DLE.
77	Experience
78	explain the lesson and not to have people unmuted for video and to get that video sent to you.
79	finding more key details in ela
80	Fix curriculum
81	Focus more
82	For the teachers to actually teach you something. It was probably easier to give the students math problems we already knew but, I did not learn ANYTHING in math, English, social studies, etc.
83	Geography and spelling assessments
84	Get better internet
85	Get more help
86	get more help, explain in a better way
87	Getting a drive through at school and getting work for summer break and packets to learn more than we have.
88	Getting homework on weekends.
89	getting most of my work done
90	Getting on my work done.
91	Getting responses from teachers instead of only other classmates.
92	Getting the feel of being used to distance learning
93	getting up and doing my work.
94	Getting used to online learning
95	give more paper work so you can pick it up at the school
96	Give the assignment all at once not pile on daily, also quicker response times would be nice.
97	Give us recorded lessons or zoom lessons rather than just giving us work and having our parents figure it out and teach us
98	Go back to school
99	Go back to school
100	Go back to school
101	go back to school this is not working
102	Go Back to School! :(
103	going back to school
104	good
105	good
106	good
107	Good but not like school.
108	good equipment
109	gramer
110	Have a meeting each day
111	Have better software. Google classroom is not good.
112	have it be like going to school ,(its so much better in school) plz do something about student rily want school again its really hard for me in distance learning
113	have less and easier homework.
114	Have less work
115	have more cool projects
116	Have more explanations for math and other subjects.
117	Have more stuff on paper so we dont stare at the screen to much.
118	Have more teacher-student interaction outside of zoom. Nobody ever actually taught online, they just give you papers you have to do. Have teachers actually teach.
119	Have more zoom calls if possible
120	Have more zoom classroom meeting
121	have more zoom's
122	have my friend show up
123	Have pierson and the other math workbook on clever so we could manually access it instead of going in our book.
124	have some kids go at least 2 or 3 times a day to study at school, with distance, and switch kids the next day.
125	have teachers explain and clarify into more details-if needed
126	Have teachers spend more time checking in and reviewing work individually with students
127	have textbooks to use so not all online
128	Have the actual book we were reading. Get a more in-depth understanding of the mini lessons.
129	have the teachers meet with each student individually that way students can get answers quickly while not having to ask in front of the class
130	Have to have some classroom interaction to learn concepts better.
131	have to improve my i-ready
132	Having a one on one chat with teacher privately once a week.
133	Having papers u can print out so you can do your work on paper.
134	Having to put all my interactions on the internet felt wired and I was not comfortable with it. Many sites the teachers ask us to use ask for access to change, add, and remove stuff from student accounts and my parents and I were not comfortable with that.
135	HELP TO GIVE THE HARD WORKING TEACHERS A PLAN.
136	history
137	I improved distance learning
138	I am Student's mom completing this survey because he is unable to navigate technology without help and he cannot read. The distance learning only worked for him because I was able to work from home to accommodate his zooms for school and other IEP services. If I was not home with him, he would have NO access to distance learning or his services.
139	I believe teachers should be more involved and helpful. Like sending recorded lessons or live lessons on zoom. And not pile up students with tons of new school work without teaching us how to do some of the work. Thank you
140	I can improve my Distance Learning by asking more questions during meetings so I understand fully what to do with each of my assignments.
141	I cannot think of a suggestion, but here's some feedback: I liked that at the end of the year we did a one-on-one zoom check-in with our teacher. I thought it was a good way to kind of wrap things up and make sure that the student is up to date.
142	i cant think of any suggestion
143	I did learn a lot by grabbing homework. (Translated from Spanish)

Distance Learning Open Ended Grades 4-6 Responses

Anonymized ID	Grades 4-6: Translated student Survey Responses to "What is one suggestion that you have to improve your Distance Learning Experience?"
144	I did not like Distance Learning. I don't know how to make it better. I got bored easy. I was home by myself most of the time my parents were at work. I just did other things instead.
145	I didn't like having to do the daily engagement surveys every day because my response was the same every day
146	I do not have a suggestion.
147	I do not have a suggestion. Everything was great.
148	I do not have any questions
149	I do not have any suggestions.
150	I do not have anything to change
151	i do not have one
152	i do not have one.
153	i don't know
154	I don't know
155	I don't really know but I just prefer going to school than online school because i think i learn better in actual school.
156	i don't have a suggestion because i did amazing
157	I don't have a suggestion to improve my Distance Learning Experience.
158	I don't have a suggestion.
159	I dont have a suggestion. I think the Distance Learning was perfect just the way it was.
160	I dont have a suggestion. The only suggestion is to probably have some meeting like 4 days a week.
161	I don't have any suggestions.
162	I don't have anything for it because it was the best ever
163	I don't have one
164	I don't know
165	I don't know
166	I don't know
167	I don't know
168	i don't know but i say a little bit
169	I dont know what would improve our lessons
170	I don't know.
171	I don't know.
172	I don't know. I think I learn better in a classroom
173	i don't know...
174	I don't know?
175	I don't like distant learning at all. I do not learn that way.
176	i Dont like it
177	I don't like zoom.
178	I don't really have a suggestion
179	I don't really have any suggestions.
180	I don't really have many suggestions for Distance Learning because it is already perfect.
181	I don't think that I have a suggestion, I think that Distance Learning was good especially since it was probably the first time a lot of us had done it.
182	I don't understand this question sorry for not answering
183	i feel its better to be in the classroom
184	I feel like I was teaching myself more than my teacher in quarantine but when we were in the class room she taught a lot
185	I feel like it is a lot of effort, and we have lots of loud kids that are often unmuted. In my honest opinion, I didn't like it that much, because people got distracted easily, and people don't do as much work, because they are slouching while working and could be playing games.
186	i feel like some of the lessons should be explained better
187	I feel that all teachers should have did zoom-actual teachings and checked in on students daily. Since they are at school for 8 hrs, I felt like there should have been more of an effort on the teachers part. Less work completed on the computer-so the children will not lose their writing skills.
188	I feel that my school and class took it on very well, but I feel, at least for my class, could of had zoom calls on a more regular basis. They were never just once a week. Sometimes there was two times a week, sometimes it was one every two weeks, it just depends on the day. I feel that we could of made it more regular, so I could prepare for it.
189	I hated distance learning. It was very hard for me to focus on completing assignments and my Mom had to help me with everything. We had math zoom three days a week but everything else online assignments. Benchmark was frustrating and the hardest thing for me to complete. I was on the computer most of the day and it was very hard for my family. My teachers were great but I don't feel like I learned anything new. Please let me go back to school.
190	I have n ok suggestion
191	I have no suggestion.
192	i have no suggestions
193	i have no suggestions
194	I have no suggestions.
195	I have no suggestions.
196	I have nothing to say for now.
197	I have to become more patient with the work.
198	I have to complete my work on time.
199	I have to improve using technology
200	i have to inprove my math
201	I honestly didn't like Distance Learning at all...but I guess to make it better, we could do something we didn't already know. Like, not just review.
202	I hope we don't have to return to distance learning. Our teachers did amazing but I feel the kids went from having all the support in the classroom to having to become very self disciplined and learn how to manage time and workloads on their owns. I think we expected too much from our children. There were so many distractions at home and I feel like distance learning did our kids more harm than good.
203	I liked it but I still miss my friends because I do not see them a lot any more.
204	I liked it the way that it was.
205	I loved it so much. You did a great job 🙌👍👏👉❤️🧑🎓
206	I lreaned how how to do benchmark online
207	i miss going to school
208	i need a classwork
209	I need more help
210	i need to improve doing work online and doing assignments i have to do.
211	I need to improve volunteering like how I used to more.

Distance Learning Open Ended Grades 4-6 Responses

Anonymized ID	Grades 4-6: Translated student Survey Responses to "What is one suggestion that you have to improve your Distance Learning Experience?"
212	I need to increase my habits and having motivation for actually wanting to do school work.
213	I need to learn math more
214	I need to make time to join zoom meetings.
215	i need to start going to class but still...i cant wake up on time so i dont know how to do the work plus my teachers assign work so mouch
216	I need to study more to get better grades.
217	I need zoom I bet it is much easier
218	I never got any responses from the attendance survey when I asked questions. My father is a teacher and he answers those for his kids, so I thought mine were supposed to be answered, too. I was extremely behind on one of my assignments because the same question I asked was never answered even though I put it in the survey for 5-6 days.
219	I never want to do it again
220	I preferred the breakout rooms in zoom because it was easier for me to focus when there was only 4 students. When it was the whole class it was distracting because students were acting silly and there was a lot of background noises.
221	i ready
222	I really dont know
223	I really miss my friends and I am an outgoing person so I like to socialize.
224	I really need a little 1 on 1?
225	I remeber and I will give them space
226	i study alot more
227	I suggest adding more questions to the daily check-in to fully understand how a child is feeling
228	I suggest taking notes because your not out of school yet and you learn more and better.
229	I suggest that the teachers might want to think of breaking classes up into groups on different days. My teacher did this, and it was so much easier.
230	I suggest to not do all of your school work for the week in just one day because I bet students in my class do that.
231	i suggest we have more websites to go on
232	i thank you for everything you did for me
233	I think I am just used to having someone to ask questions in person.
234	I think it is as good as we currently are able to make it.
235	I think it was bad because of the covit-19 but so far i was good
236	I think it was pretty settled. But, one suggestion that I have is maybe when we are on zoom our teacher can do one or two problems (math or anything we're learning at the time) with us.
237	I think it would be best to have scheduled times in the day for different classes on zoom like math, science, history etc.
238	i think it would help if zooms were better.
239	i think it's ok how it is
240	I think maybe more reading. I though that was lot of fun.
241	I think my experience was very good considering the situation.
242	I think my teacher needs to do more teaching in the zoom meetings
243	I think printed math would be helpful. :):)
244	I think should do be able to do it always at a early time.
245	I think that it would be better if you made it so the zoom is always running so that you could log on whenever you need to get help.
246	I think that should work more on simplifying fractions.
247	I think that the district and all of the teachers and staff did a tremendous job in organizing our school and students. I also think they did an awesome job in supporting and always putting their best effort into trying to have the students learn as much as possible despite the many challenges we all currently face. Personally, the whole distanced learning thing and teachers trying to connect and engage their students as much as possible throughout this whole process, was organized very well. But, if I had one suggestion, (and I don't mean for it to be more work for the teachers), it would be to not assign schoolwork all at once. Through my experience, my teachers gave my class and I all of our work on one day at the beginning of the week. For me, it was very overwhelming to see all of the work we have to complete in a week, all a once. So, I was obliged to finish all of it at once, which is tough. So, it would be a great help, and make it seem more as if we were actually at school if we were assigned our work each day throughout the week, to help us get our schedule a bit more organized. Thank You!
248	i think we should have more work
249	I unproved by getting more confindent by doing my work by myself!!!!
250	I want to go to school and thats all.
251	I want to have video chats.
252	I wanted to do more by myself. my mom is an essential worker it was hard to get help when needed
253	I was not able to answer a lot of questions because on this because we did not do zoom meetings. The teacher should change it up every week and not give the same things to do.
254	I wish I was actually there :(
255	I wish that we could have zoom meetings where our teacher had walked us through with all our assignments. I feel this way because some of the things that my teacher had assigned us was a little difficult and I had just wish that she had walked us through it on a classroom.
256	I wish we could do zoom with my teacher while I am doing computer work at the same time. That way if I have any questions, she is right there.
257	I wished to have different assignments every now and then to change the work schedule. I also wanted zoom meetings, but overall this Distance Learning was a great experience!
258	I would enjoy more video calls/zooms because my class only had one a week.
259	I would have liked the majority of our work due at the end of the week rather than the next day. I would have also liked having more than one call every day or almost every day.
260	I would have liked to get a full week of assignments on Monday so I could work on my own schedule instead of having work given each day that was due that day.
261	I would have to check my assignments daily so that I wouldn't miss any schoolwork.
262	I would have to say not be so much on the screen because your on the screen for zoom meetings and then you are on the screen for your assignments the teachers give us.
263	i would improve nothing.
264	I would like if the pandemic were over and woe would get back as a class.
265	I would like if we could have a bit more time each zoom call.
266	I would like it if I could go to my school once or twice a week with a certain amount of kids to keep everyone healthy
267	I would like it if you gave us the problem sets (on paper) for us to do.
268	I would like more office hours times available. Office hours was when the teacher was online and available to have questions answered with our daily work. We had office hours every other day and they were an hour in length.
269	i would like more time to talk to friends while on call
270	I would like there to be more zoom meetings with my teachers.
271	I would like to get an entire week's worth of work at one time so I can work at my own pace.

Distance Learning Open Ended Grades 4-6 Responses

Anonymous ID	Grades 4-6: Translated student Survey Responses to "What is one suggestion that you have to improve your Distance Learning Experience?"
272	I would like to get more work during this time. I felt like this work was too easy and not that much was given. I want to push myself to be seldom challenging.
273	i would like to have a certain class where its optional on Wednesdays where you where just join there to talk about things. (if your bored)
274	I would like work to be similar amount each week. One week there was so much work that I almost couldn't finish and then the next week was a make up week and we had hardly any work. If I would have known we would have two weeks to do all the classwork. I would have felt better. The last three weeks I have only had enough work to do maybe 15 minutes a day. zoom meetings didn't start until a couple weeks ago so I was only able to do a few. My sister did them everyday. It would be nice if my sister and I had the same amount of work. She had so much and I felt like I had hardly any.
275	I would prefer to see my teacher in person. We blind learning is hard.
276	i would say i have to be honest about this. my zoom meetings seemed to last forever. 45 minutes to an hour was too long for me because all i had was one or two questions but otherwise i knew everything they talked about. i know that some other students may need help and i respect that, it just that my preference would be to only have like one 30 minute zoom a day to check in on everyone instead of spending two hours on zoom every other day.
277	i would say just to be able to search your school so you dont have to scroool and scrool if school starts with the letter in the end of the alphabet
278	I would suggest having more work in Teacher's Distance Learning class.
279	I would suggest more interaction between the students and the teachers. I would also like more assignments from the teacher herself.
280	I would suggest one zoom Meeting everyday
281	I would suggest that my teacher keep things better organized so it's easier to find my assignments and know what is due when. My brother's class had daily assignments so he always knew what to do that day and my sister's class offered a weekly schedule and that seemed much easier for them to know what to do. My teacher was not very organized.
282	I would suggest that the teachers go into further explanation via zoom.
283	I would suggest to teach the lesson before assigning the homework. Also you should do points for attending, and it's affects their grade.
284	I would want more interaction with my classmates, so we can communicate more.
285	I'd rather not show my face.
286	Idk
287	Idk
288	Idk
289	Idk
290	If i got to interact with my teacher a but more and he helped me to learn more.
291	If i would improve the Distance Learning I would want to have more topics that we normally would learn in school.
292	If my teacher gave less work. It was a bit too much, and I had more than my 6th grade sister is what my mom thinks.
293	If the teacher could get back to us a little sooner especially when we are in the middle of trying to learn the chapter.
294	if they have not forgotten about me, that would have been great to learn this whole time.
295	Im a twin and my sister had like 5 times the work I did. I would rather be in school all day.
296	i'm making away by people
297	I'm not quite sure.
298	I'm not social
299	i'm not sure
300	I'm not sure I have one
301	In Distance Learning my suggestion is not having 2 zoom meetings on Monday because it can be over whelming
302	in each assignment it is necessary that keep all audio assignments with text support because it is very hard for me to understand audio pronunciation. i speaks urdu language at my home.
303	Instead of using zoom for class meetings, we should just use face time or google duos.
304	is that the school district could make it so the chromebooks allow us to watch the videos are teacher give us I had a lot of trouble playing the videos cause they were restricted even though my teacher sent them to us
305	It is harder to learn when you are mostly just doing the work yourself and not able to get efficient help from our teachers.
306	it keeps me home
307	It so stupid it hate all Chinese now
308	It was great, continue making it fun!
309	It was to much having all of my subjects every day I felt really overwhelmed and felt like I didn't have anyone to answer my question. Math was the worst and the zoom calls weren't helpful because its embarrassing with all of your classmates talking and my teacher didn't have a white board or anything to walk me through if I had real problems its not her fault its just that my sisters school was better. She was on a block schedule and on Wednesday all her teachers checked in with her to see if she had any questins so she only had school 4 days a week from 9-2. I was pretty jealous also my mom didn't have to help her as much because her teachers were always available during the hours she was doing school My mom had to really be my teacher while I was doing school this way
310	it would improve it for me if we would have zoom meetings.
311	It would be nice if it gave notifications when a new assignment was posted.
312	It would be nice to have a weekly game that used a topic that we are learning about.
313	its helpful and its helpful to do one on one learning
314	Just a little less work. I know it's required by law to have a certain amount of work, but it was very stressful having to do other thing around the house. I personally do not like distance learning. Also, I put almost nothing ↑ because it was the end of the year, mostly tests.
315	Just because it's not the real school. Doesn't mean you can't do your work.
316	just give us a packet every week
317	Just have fun talking and learning from your teachers
318	Keep regular zoom calls
319	Keep zoom meetings to 4 days a week.
320	Khan Academy is too much of the same, I would use some other learning site.
321	Kinda on math and it not really easy at distance Learning at the fist time but at school you get lot of help with your teachers and alot of learning."
322	Later zoom calls
323	Learn much more than what I have already learned (Translated from Spanish)
324	Learning on how to use the toolbar.
325	Learning where and when
326	Less assignments that you need to take a picture for.
327	less homework and more resources
328	less meetings.
329	less school work
330	Less school work. More time to be a kid.
331	Less stuff due in 1 day.
332	Less time on the computer.

Distance Learning Open Ended Grades 4-6 Responses

Anonymized ID	Grades 4-6: Translated student Survey Responses to "What is one suggestion that you have to improve your Distance Learning Experience?"
333	less videos so I do not strain my eyes so much
334	Less work
335	Less work
336	less work more interacting with people
337	Less work on iready
338	Less work, more challenging
339	Less zoom meetings
340	Let us go back to school.
341	let us watch youtube on weekends
342	Let's go back to school and not do distance learning in the fall.
343	Like most, I didn't LOVE distance learning because of the lack of physical interaction, though this did allow me to work at my own pace. My teachers did their best while distance learning but i feel that nothing could truly make this experience that of actual school. Though, in saying this, i do realize that due to our circumstances going to school is out of the question.
344	Live online class instruction.
345	Longer classes
346	Longer time on zoom. Assignments need to be more legible and the fill-in needs to work better on the forms. Creating text boxes was too time consuming and difficult for the student.
347	make each zoom class more interesting then just talking. It helps more kids pay attention.
348	Make Fridays a fun day by playing learning games.
349	make it a bit more fun
350	Make it a lot more interesting, and communal.
351	Make it more fun for students. Have actual lessons by the teachers.
352	Make it so that we don't have to go on clever every single day.
353	make learning FUN
354	make like a already recorded video then send it to the students and then email her a question. so if you get something wrong you don't feel bad or sad
355	Make the learning materials accessible - meaning easy to type the responses instead of creating boxes
356	Make the work more challenging.
357	make the zoom calls a little bit shorter, sometimes its too long that after a while I start to lose focus and wonder off
358	Make the zoom meeting longer. It was usually just 15 minutes and then the teacher left and turned over the "Host" responsibility to one of the students in class. Also, it would have helped if the teacher set up individual sessions with me (and other students in class) since there are only 10 kids in my class.
359	Make the zoom meetings longer.
360	making it more interesting it was boring
361	Making sure I have the correct answer and fixing my problems
362	making technology less complicated
363	making the instructions a little more clear
364	mamond (Translated from Spanish)
365	math
366	math
367	math
368	math
369	math
370	math
371	math
372	Math (Translated from Spanish)
373	Math and beyond math
374	math and more
375	math witch is weird because I am great at math.
376	math, i think?
377	Math, trying to figure out how to type the answer correctly in the form the course wanted.
378	Math.
379	maybe all the subjects not just math and ELA
380	maybe give each kid a certain amount of time to say something on zoom
381	maybe give tips on what to do during middle school.
382	Maybe if they did more subjects.
383	Maybe longer zoom calls
384	Maybe next time do zooms for each class, like one for math class and your original class.
385	Maybe some work thats not on the computer? Like we have to make a poster, or write an essay on paper instead of everything being on a screen.
386	Maybe teachers could help a little bit more or be a little more clear in the instructions they are giving to students.
387	Maybe try not to put so big and long of assignment all in one week
388	Maybe try to be early on time at regular school so I can know that there is some quarantine and we need to do online classes, because I had a lot of work when I didn't know about this until the 26 of march or so.
389	Maybe we could have longer zoom meetings so students have more opportunity to learn.
390	More 1 on 1 help between teacher and student
391	more 5th grade math
392	more chocolate milk breaks
393	More class meetings.
394	more class work instead of the website
395	More clear instructions.
396	More colaberation
397	More engagment
398	more feedback from teachers and support
399	more fun
400	more fun stuff like egg drop.
401	More fun things to do.
402	More guided ELA
403	More help
404	More help on assignments
405	more homework
406	More information and communication maybe and better computers for students possibly.
407	More instruction

Distance Learning Open Ended Grades 4-6 Responses

Anonymized ID	Grades 4-6: Translated student Survey Responses to "What is one suggestion that you have to improve your Distance Learning Experience?"
408	More instruction
409	More instruction time with my teacher
410	more interaction between teacher and students
411	More involvement with teachers
412	More lessons. Majority of zoom were meetings for kids to ask for help
413	More live (zoom) instruction.
414	More live conferences
415	more live videos and zooms
416	More math and no zoom just email
417	More one on one time with our teachers
418	More online interaction
419	More school work to fill a regular 6 hour school day.
420	More Social Studies
421	More structure. Student would like it be more organized where every day she has a Newsela, a Khan academy then maybe a homework assignment, instead of it being so random. It was extremely helpful once the teachers started having recurring meetings on set days.
422	More talent shows or Expressing how you feel on a class day (like Friday) You can go on zoom with your class and express how you feel.
423	more time
424	more time
425	more time from my teacher.
426	More time learning in zoom and not just reading a book or talking.
427	more time on each family project. One a week was too quick.
428	More time with actual instruction vs. and overview with independent work. Teacher did a great job under the circumstances!!
429	more time zooming
430	More videos of teacher teaching
431	More whole class lessons
432	More work interesting work and a way to work with classmates
433	more zoom
434	more zoom meeting
435	More zoom calls
436	more zoom lessons
437	More zoom meeting
438	More zoom meetings
439	More zoom meetings about the thing we are learning about.
440	More zoom meetings.
441	More zoom meetings. At least 3 to 5 times a week.
442	More zooming
443	More zooms
444	More zooms and less recorded videos
445	Teacher is AMAZING but we need to get back to the classroom. I miss my friends and I miss school
446	Teacher and teacher can give me homework so i can focus. and get my grades up.
447	My homework.
448	my math (Translated from Spanish)
449	My math but I'm getting good at it
450	My suggestion is next time online is maybe change the way we turn in work because that is one of the things that makes it complicated because the way of turning in work changed and made thing more confusing.
451	My suggestion is that studying more
452	My suggestion is to at least have one video a month with each student to see hoe they feel.
453	My suggestion would be to have more zoom meetings and if possible, meeting in person.
454	My teacher did a very good job
455	My teacher gives Feedback
456	My teacher had a zoom call with us every day she was available, but I know some teachers, like my sister's, only had it once or twice a week. I think it should be a requirement to have multiple zoom calls throughout the week so the teachers can answer questions and give live lessons.
457	My teachers did very little for us except for two, hour long zoom meetings on Monday, Wednesday, and Friday. They were so repetitive and non informational. They pretty much didn't care about anything except for what they were doing with their non school life, other teachers non school life, grades, and analytics of attendance and work. My seggestion is to include 6th grade into middle school.
458	My writing is slightly better. And knowing what a word means by searching it up in Google.
459	Na
460	need help with decimales in math
461	Need more hands on projects and less digital work.
462	Need more zoom classes on every new topic or lesson.
463	need to focus more
464	Never do distance learning again.
465	Never procrastinate
466	new social studies learning system because this one is not it.
467	No Benchmark
468	No distance learning
469	No lag, please!
470	no more IXL so
471	No suggestion
472	no suggestion, i liked doing my work at my own pace. but my mom had to help me stay on task
473	No suggestions.
474	no work
475	no zoom
476	non
477	none
478	none
479	none
480	none
481	none
482	none
483	none

Distance Learning Open Ended Grades 4-6 Responses

Anonymized ID	Grades 4-6: Translated student Survey Responses to "What is one suggestion that you have to improve your Distance Learning Experience?"
484	none
485	none
486	none
487	none
488	none.
489	Not always to kick out of zoom
490	Not as much yelling, games once a week
491	Not be absent and finish my work on time.
492	Not being lazy
493	Not being muted all the time and ACTUALLY ANSWER MY RAISED HAND.
494	Not do it . Being in class is way better for us.
495	not do it or shcool
496	Not enough zoom calls.
497	Not have so much screen time. (Printable worksheets)
498	Not much but, maybe something to change is on google classroom, when I need a specific item, I want to have a search bar to list the item needed, then it is pulled up for me.
499	Not sure
500	Not to do distance learning
501	Not to have Distance Learning at all. It makes it hard to learn through a screen and would be much more helpful to be in the classroom physically. Through a screen you don't learn that much, and it is harder and less comfortable to ask questions. Therefore, Distance Learning was not helpful to me.
502	Not to take really long on my 15-20 minute writing assignments.
503	Not zoom everyday
504	nothing
505	nothing
506	nothing
507	nothing
508	nothing
509	nothing
510	nothing
511	nothing
512	nothing
513	nothing
514	nothing (Translated from Spanish)
515	Nothing besides I want it so if your teacher assigns you a website or video that it would not be blocked(if the website or video was blocked and it was something assigned to us.)
516	Nothing I like it and would change nothing.
517	nothing i think it was perfectly fine
518	nothing it great
519	Nothing it was good
520	nothing Teacherr was extremely helpful
521	nothing much
522	nothing really i like the way it is.
523	nothing,just right
524	Nothing.
525	Nothing....I am waiting for school to get over so I can start my summer
526	Now that schoolwork is happening at home, students are spending more time than ever online.
527	on my quoitons
528	one is that doing i-ready and Khan academy really helped me.
529	One suggestion I have is not being too distracted by things.
530	One suggestion I have is that every once in a while the classroom plays a game, to make things more fun.
531	One suggestion I have is that if a teacher sees that the student is not doing well, it would be great if the teacher could try to get with the parents and find a time for privet lessons.
532	One suggestion I would say is to try your best when doing Distance Learning.
533	One suggestion is that I should stop going on google classroom while doing my zoom meeting at the same time.
534	One suggestion is to give us a little less homework(since the home isnt an ideal learning place with more distractions).
535	one suggestion is to never unmute everybody at once.
536	One suggestion is to not have more than 1 P.E google classroom.
537	One suggestion that I have is to give a little bit more school work.
538	One suggestion that I have to improve my distance learning experience is to use zoom as a live class session.
539	One teacher was great the other teacher never answered questions or checked in with us.
540	One thing i would do to improve distance learning is probaly more zooms, like we used to see each other and interact with each other everyday, but now we only see eachtoher like 2 times a week. then, we would be able to interact more with our teachers and peers.
541	One thing that I improve is math because I always have trouble with it
542	Only had zoom calls twice a week, I would like more.
543	Overall, I think that the way we experienced Distance Learning was very helpful and I can't think of anything that would improve it.
544	Pay more attention to individuals who need help more than others and not just put them all in one classification and assign that classification work. And focus on what students need more help on a subject, and those who don't, and assign work that way.
545	Paying more attention to the questions on google classroom to answer them.
546	Paying more attention.
547	PE
548	Please stay home
549	poop
550	Post more assignments, and have interesting projects.
551	post more websites to go to
552	Post resources to practice all subjects.
553	Print things for us to pick up and no deadlines cuz my parents haveto work a lot and i have noone that can help me with any things like my parents do so its hard on me to do without them.
554	Put all the formats in one place. I had to go to other websites to find my math test, which also had a different name on the website, making it a little difficult. I could be very confusing for other people to have to go back and forth through websites to find the same thing.
555	Put school back to normal for students as CDC WHO and other say children are 10 time more likely to get hit by lightning than dieing fro. Covid-19.

Distance Learning Open Ended Grades 4-6 Responses

Anonymized ID	Grades 4-6: Translated student Survey Responses to "What is one suggestion that you have to improve your Distance Learning Experience?"
556	PUT US BACK ON CAMPUS
557	Reading
558	Reading
559	reading the instructions
560	Schedule meetings with the children individually every week for just 30 minutes to check in with them and see how they're learning is going
561	Schedule was often unknown until Monday so parents had work conflicts. Wish weekly assignments were released on Friday for the next week so families had time to review and adjust scheduling!
562	seeing my friends
563	shorten the amount of work done.
564	Small group zooms
565	Smaller group zoom meetings
566	some times
567	somes class just to talk to our friends
568	Something that would help me will be to have zoom each day for we can understand more
569	Spamming things that isn't school related
570	speaking up
571	start using discord instead of zoom I try downloading zoom but I had to by my self change the program to let it run in windows 10 . if you cant get discord get a program to run windows xp " 7 : 8 :10 and chrome book and perhaps Linux . so I will never have to every time open zoom redownload it and change the properties in its file. so it can run windows 10 "yes I'm a tech geek"
572	stay 6 feet away from others
573	stay away from people for like 3 feet
574	Stay focused and answer all questions/read through all questions thoroughly.
575	Stop coivid-19
576	teach some lessons live
577	teachers checking gmails more, and more hands-on stuff. Like get your own supplies and do this experiment (requires nothing to print out).
578	Teacher's could maybe respond to questions faster.
579	teachers rights back from studet email
580	Technical Diffuculties
581	That I have to wake up earlier.
582	That if i do homework on weekends, and asked a question, they will not see it until Monday.
583	that it would be way easier
584	that teachers teach relevant topics to children about whats going on in todays world, and that they get authorization from parent before showing certain videos regarding culture, history or politics.
585	That the classes are like in the normal school (Translated from Spanish)
586	That there should be more video calls
587	that there should not be a distance learning and pandemic because we all learn best in real person.
588	The district should give teacher more/better support.
589	The one suggestion that I have improve my distance learning experience is to focus.
590	The platforms working beter
591	The teacher could be more prepared for daily topic. Many days she was not able to "teach" the math lesson because she said she just didn't understand it. She was not engaging and had many distractions in her house. At the 6th grade level it was quite boring having her read to us, whether it was from a book or science topics it seemed like it was just an easy way to kill time and she often stumbled and read the words wrong anyway. Our zoom class was one hour every day. Many days it would start late because she was distracted or took a while to take attendance. We had 10 minute breaks about half way through class. We also had break out groups of only two kids per group. This was a waste of time because we never knew what to do and it was awkward talking to just one randomly assigned classmate. I don't feel like I learned anything through distance learning!
592	the Teacher sends electronic math and other and then the parents print it.
593	The teacher talked a lot and didn't give us kids time to talk and connect. She assigned too much work especially in the beginning, she also told my classmates PERSONAL business to the whole class which i think is inappropriate. She only "taught" math and assigned a lot! She never did anything fun with us and she never interacted. We never had any kind of... teamwork or actual talk time to one another. 😞 I think other teachers did better cause (my teacher) was like that in the class to. :(My suggestion would be... PLEASE LET KIDS HAVE FUN! I'm an only child and trust me I get bored within a second of doing something. BUT! I DO NOT want to go to school during covid-19 and that's final!
594	The teachers did great on distance learning
595	The teachers need more practice on on line teaching
596	There could be more instruction.
597	There is nothing that I can think of ecsept harder math for the people that are better at math
598	There was no direct instruction from the teacher either on zoom or recordings but there were also no concrete deadlines for assignments as students were working at their own pace. Moving forward, it would be beneficial to have direct instruction, a task assigned then feedback provided to the student.
599	There's nothing I think really that needs to be improved it was fun
600	to alwas ask quotations no matter what never give up have faith in you
601	To answer all of my questions.
602	to be on zoom while working so she can teach us how to do the work
603	to be patience and to be grateful for what i still have
604	To be smart.
605	To communicate on one platform and not 3 or 4
606	to definitely know how to use google classroom.
607	to do more communication.
608	to do more with my class
609	To do something fun!
610	To explain the homework that they give us in zoom meetings.
611	To fix all the students mics, computers, cameras, and anything else technical that interferes with the zoom meetings they and I attend to.
612	To get a text whenever we have no school or to get a notice before hand
613	to go back to school. With my teacher, friends
614	to go outside
615	To have direct instruction through zoom every day
616	To have live class to learn more.(with zoom)
617	To have more teaching and projects and less giving out work.
618	To have more time to turn in stuff instead of doing it just right away.

Distance Learning Open Ended Grades 4-6 Responses

Anonymized ID	Grades 4-6: Translated student Survey Responses to "What is one suggestion that you have to improve your Distance Learning Experience?"
619	To have more zoom meetings
620	To have zoom meetings for at least one subject every day.
621	To help me learn more I read books 30 minutes a day
622	To improve my Distance Learning Experience my suggestion is to use a better video call software because zoom both lags and is not as secure as other software such as Discord.
623	to keep working or go on zoom alot
624	to learn more about 7th grade
625	To learn to do things on my own
626	To make it more interesting
627	To make it more engaging.
628	To never get frustrated and be patient.
629	To not have a meeting every day
630	to re meder my times tables
631	To start listening
632	To stop distance learning. :(
633	To try harder and always do my work even if I want to slack of just keep going.
634	To work harder in the things I am weak at!
635	too much
636	Try to get most of my work done but when I got every homework done the faster I got to play games
637	Try to have a zoom meeting where we do a math problem set together or something else.
638	Try to help individual students instead of the whole class at once.
639	Turning in missing work. The teachers give so much of it it's hard to catch up.
640	turning in work on time.
641	Umm, I don't know
642	Umm... Maybe we could do like short private calls with our teachers, with just us?? That would let us talk with our teachers about things we might not want the WHOLE class hearing. Also, maybe less homework. I am getting REALLY overwhelmed by all the homework we are getting, mainly in math.
643	Umm...do better in my math.
644	unsure
645	Use more zoom. Daily connections with class and teachers. More math homework.
646	Use something called discord not zoom because it is the same thing pretty much it is a lot easier to some people than others.
647	Using Gmail to contact others
648	using the computer
649	Vary cool
650	Video instruction, daily assignments
651	We all work in small groups through zoom and google classroom
652	We are taught lessons on zoom (or other) and are assigned more homework
653	We could do school work on zoom
654	We didn't learn science at all in Distance Learning, so maybe what I would improve is a little more of science.
655	we don't have that much homework anymore!!!!
656	we go to normal school every other day like 3 days a week
657	we have no adults or work
658	We learned nothing with Distance Learning. It's terrible and the kids deserve to be in a classroom to learn the correct way. You can't expect teachers to teach this way....they should be in a classroom. It's as if summer started in March. Kids lose interest.
659	We should have a "panic" room if you are stressed or very confused you go there and someone will help you calm down.
660	We were in front of the computer too long. Pencil/paper work would be nice.
661	well
662	Well I would just say that more teachers need to do more zoom meetings per a week because I did zoom meetings all five days and it was better learning wise for me.
663	Well, Kahoot definitely made distance learning better
664	When doing Math maybe a little more problem to help with practicing.
665	When the students asks questions, the teachers need to read it right and answer back.
666	Work hard.
667	work in a quiet place
668	Working in a zoom group
669	you can answer on the mathclass sight in stead of google docs
670	You should let us be able to talk to other students in the class if one person is not behaving punish them not the whole class so I don't even really even get to talk to my classmates.
671	zoom call lectures would have been better than just watching khan videos
672	zoom meeting
673	zoom meetings
674	zoom meetings are long and annoying. I can't remember stuff from it.
675	zoom meetings for spanish classes
676	zoom or just video calling is hard because some people talk over each other, and using the projector at school helps and there is no projector during our distance learning. Only once it was used.
677	zooms everyday not once a week-or once every other week because every other week we have art on the zoom
